Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3634

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 4, 6-9, 11, 12-15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Drower et al. 5,779,066.

As broadly as claims 13-14 recite, a "movable stop" could be one of the retaining members shown in Drower et al. '066.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 2 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Drower et al. '066.

The relative dimensions of the areas created by dividers (41) or (151) in Drower et al. '066 is of no patentable weight and is considered to be a matter of choice

and design. The manner in which the end stops are fastened to the housing is also considered to be a matter of choice and well within the purview of one with ordinary skill in this art.

5. Claims 24-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Drower et al. 5,915,573.

Note that lips (45) and (105) shown in Drower et al. '573 separate the channel into at least two areas. Also, note that retaining members (51) and (111) can be inserted by folding and rotating, or by sliding into the ends of the channel before end plugs (39) are put into place.

6. Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 16-23 are allowed.

8. The patents to Morrisson, Stemmons, and Hsiao are cited to show similar structures.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert W. Gibson, Jr. whose telephone number is 571-272-6829. The examiner can normally be reached on M-F 7:30 to 4:00.
